EDUCATION

National University of Singapore **Aug 2025 – Aug 2026**
- M.Tech in Enterprise Business Analytics

Indian School of Business **Aug 2020 – Aug 2022**
- Advanced Management Programme in Business Analytics

Vellore Institute of Technology **Jul 2014 – Apr 2018**
- B.Tech in Electronics and Communication

SKILLS

Analytics	: Python, SQL, R, PySpark, PowerBI, Tableau
Machine Learning	: Scikit-learn, Keras, PyTorch, OpenCV
Generative AI	: LLMs, RAG, Agentic AI
Cloud Technologies	: Google Cloud Platform, Microsoft Azure

WORK EXPERIENCE

AI/ML Intern **Jan 2026 – present**
Singapore General Hospital, Singapore
- Reduced manual risk screening time by 75% while maintaining 100% sensitivity to high-risk incidents by architecting a decision acceleration framework leveraging LLMs and RLHF.
- Targeted a 10% reduction in clinical incidents across hospital divisions by formulating proactive clinical risk management strategies using advanced statistical models like Kaplan-Meier curves and Cox Hazard models

Senior Data Scientist (Associate Manager) **Mar 2020 – Aug 2025**
Tredence Inc., Bengaluru, India
- Reduced internal information search times by 90% by leading data science team in developing an enterprise Knowledge Management System that ingested 75,000+ corporate assets and deployed to 4,000+ employees using Agentic AI and multi-modal RAG.
- Boosted data engineering productivity by 50% compressing project development cycles from 16 weeks to 8 weeks by designing and building a fully autonomous Artificial Data Modeller using LLM finetuning and Model Context Protocol (MCP) Link
- Optimized over $3B in marketing spend and re-engaged 25M+ at-risk customers across multiple Fortune 500 clients by leading a team of Data Scientists to deploy Customer Cosmos, an end-to-end customer 360 delivery accelerator. Link
- Spearheaded research and innovation with emerging AI technologies by building reusable capabilities, collaborating with product teams to architect state-of-the-art AI solutions and enabling delivery teams accelerate execution

Research Associate/Intern **Jul 2024 – Dec 2024**
Indian Institute of Technology, Delhi, India
- Worked as a research intern on Hyperbolic Graph Machine Learning, Privacy-Preserving Distributed Graph Learning at Machine Intelligence Signal And Network (MISN Lab), IIT Delhi

Project Engineer **Aug 2018 – Feb 2021**
Wipro Technologies, Chennai, India
- Reduced workflow validation time by 87% by developing and maintaining a robust regression automation suite covering complex computational logic and workflows.

RESEARCH EXPERIENCE

To err is machine, too? (Preprint in Preparation)
Introducing a hierarchical, system-level taxonomy to diagnose, audit, and systematically red-team reasoning failures in Large Language Models.

International Conference on Data Analytics for Business and Industry, Oct 2023 Link
Co-authored 'Talk to your data: Enhancing Business Intelligence and Inventory Management with LLM-Driven Semantic Parsing and Text-to-SQL for Database Querying'

International Conference on Computational Intelligence in Pattern Recognition, Mar 2024 Link
Authored 'Towards Accurate Chest X-ray Disease Detection: A Comparative Study of CNN architectures and Image Transformation Approaches, with Emphasis on CLAHE'

IEEE IATMSI, March 2024 Link
Co-authored 'A 3-Step Framework for Improved Imbalanced Binary Classification Through Data Generation Algorithms'

ACADEMIC PROJECTS

High dimensional modelling (p >> n) to estimate biological age
Applying regularization, dimensionality reduction and other advanced learning techniques to high-dimensional genome-wide DNA methylation data to build interpretable predictors of biological age.

Using multiple facets of Health, Engagement etc. to estimate Occupational Burnout Link
Won 'Best Capstone Award' working with Peak Health Technologies, a health-care startup to utilise vocal bio-markers, textual feedback data to cluster employees using NLP techniques and statistical models like factor analysis to map them onto different axes to estimate occupational burnout

Energy Detection for Spectrum Sensing using GLRT Algorithm
A low-complexity energy detector is designed based on the Generalised Likelihood Ratio Test (GLRT) algorithm to accurately detect incoming presence of primary users in cognitive radio networks

AWARDS AND RECOGNITION

- Luminous Award - Best Recruit issued by Wipro Technologies; Dec, 2019
- Best Capstone Project issued by Indian School of Business; Jan, 2023
- Winner - Best Innovation issued by MIT Hacking Medicine; Jan, 2024

ORGANISATIONS

- Organiser and Advisor at TEDxVITVellore
- Ed-Support Teacher and Mentor at Make-A-Difference
- Competent Communication, Competent Leader and Advanced Leadership Bronze at Toastmasters International
